

# The Linguaviva Experience

At The Linguaviva Centre we focus on the person, as well as the process. We believe that spending time with students is the key to providing them with the best possible experience.

No problem is too big or too small for our Student Care Team. We know that studying away from home can be a daunting process, and we are here to help you with any bumps along the road.

We make a big deal of the small stuff, student birthdays, celebrations, anniversaries and friendships are all celebrated in style at our school. We've even had a few weddings over the years as students met their life partners whilst studying together!

We demand a lot of ourselves and expect our students to demand a lot of us. We want you to use your time at the school to meet your full potential and improve your communication ability.

We know our students by name and forge lasting relationships with them. Our students recommend and return to us. This trust is especially important to us and something we cherish.

It's not about numbers to us, it's about the Linguaviva Experience. We want students to build everlasting memories. Previous students are now sending their children to us and the children of our host families are now hosting themselves. This is the foundation of what we do.

We choose the people we work with very carefully. Our teachers, host families, transfer company and all other providers are part of the extended Linguaviva Family, sharing the same ethos as us.
